

Whitepaper

Our mission

**For a long time developer's have
Been able to go under the
Radar. To launch multiple projects
Weekly with 0 chance of success. Because
Until today there is no public Ranking
database for developers. We plan to
Compile previous , current and future
Records of all developers. And statistically
Give a success and safety rating for each.
This database will serve to hold developers
Accountable for there action's, without
Being able to just blend in with the mass
Amount of daily launches. It will serve
As a guideline, a utility for investors
To refer to for information on a devs
History and current ranking.**

Farmetrics

Network: BSC

Total Supply: 10M

Private sale: no

Presale: no

Airdropps: 5

Team tokens: no

All excess tokens will be burned pre launch

Phase 1

Phase 2

Phase 3

Roadmap

**Open the line of communication
With the community. Start research
On all community submissions.
Create and release the first list.
Launch Anti Farm on the BSC.**

**Start back logged research
Of previous projects to add
Accurate information to the
Database. Grow our community
Create awareness of the asset
We have to offer TO crypto
Investors.**

**Extend team size to Allow for
faster research and submission
Verifications. Create the anti farm
Bot. Buy adding the bot
You can use simple functions like,
"/farmers" and would immediately
Be promoted with the most
Recent anti farm list on farmers.
Same will go for ruggers and
SAFU devs.**

**Submit a Dev
Fill in the form with
Attached proof for
Submission**
